<b>Office Action Summary</b>	<b>Application No.</b> 10/531,671	<b>Applicant(s)</b> DRENGSTIG ET AL.	
	<b>Examiner</b> Yvonne R. Abbott	<b>Art Unit</b> 3644	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 10 April 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

2. The abstract of the disclosure is objected to because the words "said" and "means" should be omitted. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, and 4-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horn (5073210) in view of Mickelsen et al. (4337727). Horn shows a device for shellfish farming, comprising a transporter and a cage, wherein said cage has a

Art Unit: 3644

plurality of sides, a first side (24) of the cage, a second side (24) of said cage having couplings for engaging said cage onto said transporter, wherein said second side is located opposite said first side and other additional sides of said cage being devoid of openings, wherein said cage is turnable to achieve a plurality of positions, wherein said first side equipped faces upwards to accommodate the administration of food in a first position, faces sideways to accommodate shellfish eating and resting in a second position, and faces downwards to accommodate emptying in a third position, said positions being achieved by the engagement of said cage onto said transporter and, optionally, by disengagement of said cage from said transporter. Horn, however, does not show openings in the second side wall. Mickelsen et al. teach modular underwater cages having mesh side walls. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide that the second side wall of Horn have openings as taught by Mickelsen et al., in order to better facilitate the free circulation of water throughout the enclosure.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Horn in view of Mickelsen et al. as applied to claim 1 above, and further in view of Neff (4019459). Although Horn discloses the turnable shellfish cage, it is not disclosed that the sides of the cage are provided with buoyancy elements. Neff teaches a fish cage having buoyancy elements (18) attached thereto which would allow the cage to float in water. It would have been obvious to one of ordinary skill in the art at the time the invention was made to attach flotation elements on the Horn cage to facilitate easy

retrieval of the cage once detached from the couplings (i.e. so that it doesn't inadvertently sink to the bottom of the tank).

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
